Flexible and portable task lighting system, designed to enhance the workspace in home working and office environments. Fitted with 1800K – 3000K 90 CRI Warm Dim LED.

## Product Description

The Video Conferencing Light has been designed and developed to address good quality task lighting for the home working and office environment. VCL.Desk has a high quality glass base by which a device can rest in the dedicated groove. It is available in a choice of finishes, and some elements can be customised such as height and dimming. Includes toughened glass diffuser with adjustable kick reflector for soft distribution of light

## Key Features

- Optional phone cradle.
- Desktop and clamp versions available.
- Adjustable kick reflector to allow ease of adjustment of light effect from work surface to wall/face during video conferencing.
- Sustainable construction: made from recycled aluminium with a long-lasting anodised finish. Specialist finishes such as stainless steel anodised effect or RAL finishes available on request.
- Advanced dimming options: on-board and Wireless dimming, down to 0.1%.
