STOANE LIGHTING

Assessment

CIBSE TM66 CEAM-Make Creating a Circular Economy in the Lighting Industry

Product

FXD Type S

Results

| Category | Points Scored | Max Points Possible | Assessment | | How to an | alyse the score |
|---------------------|------------------|------------------------|------------|---|------------|--|
| Product Design | 95.0 | 134.0 | 2.8 | I | 0 to 0.5 | Very poor circular economy performance |
| Manufacturing | 32.0 | 46.5 | 2.8 | | 0.5 to 1.5 | Some circular economy functionality |
| Materials | 11.0 | 24.0 | 1.8 | | 1.5 to 2.5 | Definite/substantial progress to circularity |
| Ecosystem | 37.0 | 43.0 | 3.4 | | 2.5 to 3.5 | Excellent circularity |
| | - | | - | - | | |
| Overall Performance | 175.0 | 247.5 | 2.7 | | | |

Results Explained

Technical Memorandum (TM) 66 describes a Circular Economy's main aims, how it can be achieved and what it's practice will mean to the different branches of our industry like specifiers, manufacturers, contractors and Facilities Managers.

The Circular Economy Assessment Method for Manufacturing (CEAM-Make)'s list of 72 searching questions, the majority of which ask for back-up evidence, is split into four sections:

| Product Design: | Covering topics such as design for long life and repair |
|-----------------|--|
| Materials: | Usage of recyclable materials rather than virgin |
| Manufacturing: | Additive and subtractive techniques and localisation |
| Ecosystem: | Repair or upgrade services to complement circular economy design |

The outcome of the assessment is a single figure rating by which product comparisons can be made. A TM66 score demonstrates a product's performance in the context of a Circular Economy.
