

SL90 2700K 9mm

Date: 03/09/2025

Instrument Used: Viso Systems Labspion Goniometer.

Reference Lamp: BLV 105151 12V 50W 760lm 3000K 36°

The colour information contained in this report is based on the testing of a single sample of the Light source we use in our products at typical operating temperature, testing is done with our Goniophotometer under controlled conditions.

The performance of a light source can be altered very slightly when in a luminaire due to the qualities of the optical system, such as material used for the optic construction.

This information is intended to be used in addition to further technical information, such as light source brand, part number and electrical information, which can be provided for, and may be relevant to, your project specification.

Please contact sales@mikestoanelighting with information requests.
