

ZTA.50.Mains Track

Installation and Maintenance Instructions

These instructions are for reference only. For product-specific instructions, which may vary, please refer to the documentation supplied with your order.

IMPORTANT: All wiring connections must be made before applying power.

-  Refer to instructions/product supplied
-  Do not stare at the operating light source
-  This product should not be disposed of in your general waste
-  Please retain these instructions for future reference
-  Class II - Double insulated fitting
- IP20** Indoor Use Only
-  **t_a 35°C** Rated maximum ambient temperature
-  **CE** European Conformity
-  **UKCA** UKCA (UK Conformity Assessed)

Electrical Supply

Installation must be carried out by a suitably qualified electrician following current building and wiring regulations of the region of installation. 230/240V AC 50/60Hz mains supply to suitable lighting track.

Site conditions: LED equipment is more susceptible to static damage and over voltage than previous technology. Before handling or connecting to the mains supply ensure that all Stoane Lighting products are protected from static discharge and that the mains supply is to regulation. (230V +10 -6%)

Refer to the fitting label for the module version and total wattage.

Module information;
For module information, including supply current/voltage please refer to the product label or the instructions supplied with your product.

The energy efficiency class of the LED is available in the instructions supplied with your fitting.

Mains cables must be double insulated, strain relieved and separated from E.L.V output cables.

All connections must be made before applying power. If the supply is energised prior to making the connections to the fitting then the resulting surge will damage the LED.

The entire dimming control circuit source must be of SELV insulation class.

Stoane Lighting can provide assistance on dimming compatibility or control systems by request. For advice on specific dimming systems we recommend seeking assistance from the commissioning engineer or the control systems provider in the first instance.

Maintenance:

All lighting equipment is delicate and easily damaged through misuse or inappropriate installation (mechanical or electrical). Repairs and replacements may cause delays and will be chargeable. Contact Stoane Lighting for support if required.

All Stoane Lighting products are covered by a five year Warranty and a 25 year Duty of Care. Products are designed to be upgraded, adapted and refreshed using our comprehensive ReNew service. For more information on our ReNew service and for full Warranty terms and conditions visit stoanelighting.com or contact us at the address shown.

When supplying digital equipment with the potential to be connected to networks, physically or wirelessly (i.e. Bluetooth, WiFi, DMX radio etc.), Stoane Lighting does not take responsibility for the digital security of the equipment or associated networks. It is the customer's responsibility to select a protocol suitably robust for their requirements and to ensure responsible utilisation of passwords.

The light source contained in this luminaire shall only be replaced by the manufacturer, their service agent, or a similar qualified person.

Disassembly Information is available on the technical section of our website and is accessed by entering your product serial number. Serial numbers are typically located in an area that is not visible when the fitting is installed.

Cleaning:

Fully isolate the fitting and allow to cool.

Clean the fitting with a slightly damp lint free cloth from a mild solution of soap and water. The fitting must be completely dry before reconnecting power.

Incompatible or abrasive chemicals can damage the fitting, contact Stoane Lighting for advice if required.

Installation

Check that the track is mounted securely and is capable of supporting the total weight of the installed fittings. **Fitting Weight : 0.75kg.**

The supplied track adaptor is not suitable for connection to a phase/mains dimmed track.

This fitting should be mounted out of arms reach to prevent unauthorized adjustment.

Track must always be mounted to a horizontal ceiling, mounting track vertically or on a wall, or at an angle will result in damage to the fittings.

Installation must be performed by a qualified person.

Step 1 Insert the track adaptor into the track and secure via the locking tab.

Whilst holding the fitting, turn the fitting through 90° and the fitting will be locked in place.

Step 2 Rotate the circuit selector to the required circuit.

This product is for industrial/professional use only and not intended for use by consumers.

WARNING: Do not look at exposed LED lamps in operation. Eye injury can result.

Additional items should not be hung or suspended from this fitting. Stoane Lighting takes no responsibility for additional items added by others or the consequences of those items.

ON BOARD DIMMING (optional)

On optional 1-10V dimming pot version is available.

Rotate the pot to dim as required.

For BLE fittings this pot can be configured during commissioning to set a maximum light level.

To Add/Remove Snoot (if supplied)

To remove the snoot - Compress the lever on the circlip to release the snoot from the lamptube.

Ensure the circlip is compressed when re-inserting the snoot. Release once is place to secure.

After inserting the snoot, rotate it anticlockwise to maximise the retaining clip engagement.

This bezel will count as a single accessory in the lamptube.

ADJUSTMENT

To adjust the tilt and pan of the fitting use the supplied 2mm Allen key to loosen off the tilt and pan lock screws.

Once the desired angle is achieved lock off the screws.

DO NOT over tighten the screws as this could damage the lock and cause it to no longer function.

Pan

Tilt

ZTA.50 MODULE AND ACCESSORIES

The colour temperature and lumen output can be found on the product label on the fitting.

To add/remove accessories:

Isolate the fitting from the supply and allow to cool.

To replace Accessories

Remove the circlip to access the accessories.
Replace accessories as required and replace the circlip to secure.

To replace Optic

Unscrew the lamptube to access optic and replace as required. Rotate the optic anticlockwise to release from the holder and Replace the lamptube once optic is in place.

ZTA Zoom (Optional)

To adjust the angle of the beam rotate the lamptube;
Clockwise to widen the beam.
Anticlockwise to tighten.

This fitting will reach a soft stop when the fitting reaches the tightest beam position. Forcing the lamptube to rotate further will damage the fitting.

Note that the Zoom lamptube and optic are specific to the zoom version of the fitting.

Rotate clockwise to widen beam
Rotate anticlockwise to tighten beam.

Hold the lamptube while
adjusting the beam.

ZOOM ACCESSORIES

The colour temperature and lumen output can be found on the product label on the fitting.

To add/remove accessories:

Isolate the fitting from the supply and allow to cool.

- Step 1 Remove the circlip to access the optic and accessories..
- Step 2 Change optic/accessories as required and replace circlip to secure.

Wall Wash (if supplied) and Accessories

The colour temperature and lumen output can be found on the product label on the fitting.

To add/remove accessories:

Isolate the fitting from the supply and allow to cool.

- Step 1 To remove accessories remove circlip. Replace accessories as required and secure in place with circlip.
- Step 2 To replace the optic unscrew the lamptube in an anticlockwise direction and replace the optic as required. Replace the lamptube to secure.

Note that the optic will need orientated to the required direction.

STOANE LIGHTING

EQUIPMENT DESIGN + MANUFACTURE

Certified

Stoane Lighting firmly believe that we have a responsibility as environmental custodians, we believe that lighting equipment should be built to last, to be repaired and to be reused. As a BCorp we have pledged to operate a business not aiming to just be best in the world but a business best for the world. Stoane Lighting believe that the circular economy is a fundamental aspect of how we approach the challenges we face. If you read this at the end of the product life we encourage you to consider how you can ensure this product sees an extended life. If removal is unavoidable, please see the disassembly note below.

All Stoane Lighting products are supplied with a 5 year warranty and a 25 year duty of care.

Stoane Lighting operate a ReNew division, which can take your existing fittings and refurbish or upgrade without the need for replacing what you already have.

Through the ReNew service, Stoane Lighting provides general repair, deep cleans and electrical safety checks on luminaires, as well as possible repainting if needed. We will replace components that are nearing end of life, such as drivers, LEDs, and optics. If the fittings are to be used in a new area, or the existing space is undergoing a change in use, ReNew can offer a different mounting method or light technical performance (such as colour tuning), if needed, alongside the addition of on-board wireless control. ReNew as a service, depending on location, can be done on site or by returning equipment to Stoane Lighting.

Once fittings have been repaired or upgraded through ReNew, they will start a new five-year warranty period, and any unwanted parts will be recycled.

Product Disassembly and Component Recycling - While every effort has been made to ensure that our products are built to last and are ReNewable, there may come a point when, as a very last resort, the fittings need to be recycled. The Stoane Lighting website will provide information on how the fitting can easily be disassembled into its component parts for more effective recycling. Information on recycling services in your local region can also be supplied on request.

For more information on the above please visit stoanelighting.com
or contact us at the address shown.
