Flexible and portable task lighting system, designed to enhance the workspace in home working and office environments. Fitted with 1800K - 3000K 90 CRI Warm Dim LED.

Product Description

The Video Conferencing Light has been designed and developed to address good quality task lighting for the home working and office environment. VCL.Desk has a high quality glass base by which a device can rest in the dedicated groove. It is available in a choice of finishes, and some elements can be customised such as height and dimming. Includes toughened glass diffuser with adjustable kick reflector for soft distribution of light

Key Features

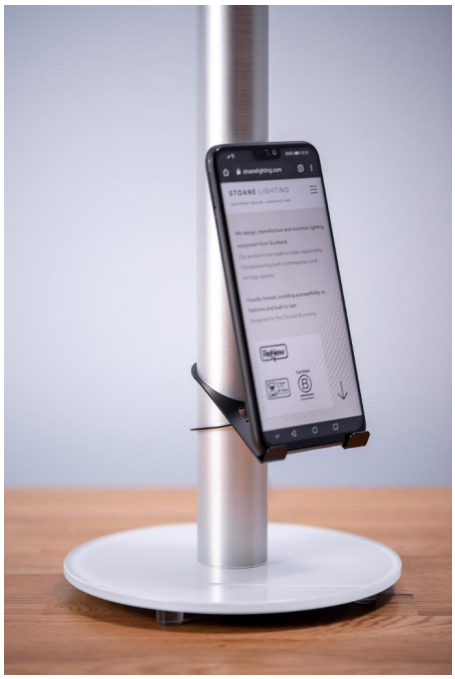

• Optional phone cradle.
• Desktop and clamp versions available.
• Adjustable kick reflector to allow ease of adjustment of light effect from work surface to wall/face during video conferencing.
• Sustainable construction: made from recycled aluminium with a long-lasting anodised finish. Specialist finishes such as stainless steel anodised effect or RAL finishes available on request.
• Advanced dimming options: on-board and Wireless dimming, down to 0.1%.
