## Environmental

### TM65.2

CIBSE's TM65.2 provides a calculation methodology to assess the embodied carbon in lighting products.

ZTA.70 MAINS TRACK

### TM66

CIBSE's TM66 includes a calculator called the Circular Economy Assessment Method (CEAM). An independent metric assessing a luminaire's Circular Economy credentials in terms of product design, materials, manufacturing and ecosystem.

ZTA.70 MAINS TRACK - 2.7

### LCA and EPD

A report containing Life Cycle Assessment results, including environmental impacts across the full life cycle of the product. Impacts cover a wide range of effects on the environment, in addition to carbon emissions.

Please contact the Specifier Support team should your project have a requirement for additional environmental reporting. For more information, please [click here](#).

---

## Photometry

These files represent the highest available initial output for each light source in 3000K. Lower outputs and other colour temperatures are available.

---

## Derivatives

We can adapt our fittings to suit your specific needs, here are some examples of what we have done before.

On Board Dimming

**Order no.** On board dim

ZTA.70.Bay Mains Track
